

ScoreWidget::clearCenter  
Widget

ScoreWidget::setCenterWidget

ScoreWidget::centerWidget  
Changed

```
graph LR; A[ScoreWidget::clearCenterWidget] --> C[ScoreWidget::centerWidgetChanged]; B[ScoreWidget::setCenterWidget] --> C;
```

The diagram illustrates a Qt-style signal-slot connection. Two functions, `ScoreWidget::clearCenterWidget` and `ScoreWidget::setCenterWidget`, are shown on the left. Both functions have arrows pointing to a signal named `ScoreWidget::centerWidgetChanged` on the right. The signal box is shaded gray, while the function boxes are white with black borders.
